☑ Excellent knowledge of **Cloud** and **LANs** - a Microsoft Gold Partner

☑ Track record of developing world-class **integrations and solutions**

Sage Business Partner

Paradise as your Partner

Specialist Sage 200 Support

Our team at Paradise Computing has been installing and supporting Sage software solutions since 1987. With a combined experience of over five decades, the technical team has designed various diverse and innovative solutions for a wide range of industry sectors.

Technical Support

Our dedicated Sage Support Team are on hand to ensure you get a prompt response to your queries. You can simply call them or email your query.

We invest in our customers by ensuring our Sage Specialists become familiar with you and your system, allowing us to provide informed and technically correct support to resolve your issue.

We offer support either under a 'fair hours' Service Level Agreement, enabling you to budget for a set number of hours support per month, allowing for peaks and troughs. Alternatively you can opt for Pay-As-You-Go support on a simple hourly fee basis, with invoicing monthly in arrears. Both of these mechanisms come with an optional gatekeeping service if you want to restrict costs by controlling which staff members approve and use the service.

Cloud & LAN Support

Paradise provides first-class Sage cloud and LAN solutions. We can either support your existing infrastructure or help you migrate to an improved platform. Paradise is certified to both ISO27001 and the government's G-Cloud program.

Software Development

Our experienced Microsoft and Sage application developers can design, develop and deliver the perfect bespoke software development service for your business. Paradise's in-house development team has extensive experience of website integration, logistics links, bespoke management reporting and a wide range adaptations from minor solutions through to entire bespoke modules.

We build powerful, complex, yet user friendly solutions to fit your business requirements. Having delivered multiple software design projects across a variety of industries, we have a wealth of experience in working with customers ranging from small local businesses right through to large multinationals.

Start your trusted partner journey

Our focus is always on delivering an exceptional customer experience, as well as offering several added value services to ensure you and your business get the most out of your Sage system.

Whatever your challenges are, contact Paradise to explore the advantages of a comprehensive multidisciplinary Sage Business Partnership.

To find out how Paradise can help your business, or to arrange a demonstration, call us today on 01604 655900 or visit our website www.paradisecomputing.co.uk
