# Sage 200 Integrations: featuring Sicon Barcoding & Warehousing, Sicon Courier

## The Challenge

Tunap sought to modernise its warehouse operations following a 2022 premises relocation, moving from paper-based stock control to a fully digital system. They also aimed to improve integration between Sage 200 and third-party courier services, eliminating redundant data entry and streamlining the entire pick, pack and dispatch process.

## The Solution

Paradise implemented Sicon's Barcoding & Warehousing module for Sage 200, seamlessly integrating with the existing system. This solution supports Android handheld devices for tasks like picking, packing, dispatching, receiving and stock-taking, all synchronised in real time. Additionally, Sicon Courier simplified the interface between Sage 200 and courier systems, removing the need for bespoke middleware and manual data entry into courier websites.

The company now processes more orders with greater accuracy. Integration with courier systems has sped up order processing and significantly reduced manual data entry errors, optimising the overall logistics and distribution workflow.

### Industry

Tunap UK Ltd, a leader in innovative chemical solutions for the automotive, industrial and consumer sectors, is focused on improving operational efficiency and service.

### Company Size

Between £3 to £10 million turnover

### Number of Employees

Between 1 to 50 employees

### Location

Tonebridge

Very straightforward and great support from both Paradise Computing and Sicon.
