CUSTOMER CASE STUDY

Paradise
Transforming ERP & IT

Sage 200, Sicon Barcoding & Warehousing, Bespoke Development

The Challenge

Fedrigoni are a global company with their Headquarters in Italy, providing high quality paper products. Fedrigoni operate on SAP across it's business.

Fedrigoni UK aimed to implement a SAP-based warehousing system, but due to high costs, sought an alternative solution.

The Solution

Paradise provided a complete solution offering a cost-effective warehousing system for Fedrigoni UK. This was achieved by implementing Sage 200 as an ERP system, with Sicon's Barcoding & Warehousing system for Android-based warehouse operations in the UK warehouse.

As Fedrigoni operates on SAP, Paradise developed bespoke integrations between SAP and Sage 200, allowing users to use SAP for desktop operations and use Sicon Barcoding & Warehousing for handheld based warehouse operations.

Through collaboration and a solid partnership, Fedrigoni UK now benefits from a complete warehousing system at a fraction of the cost of a SAP linked warehousing system.

This was achievable through Paradise's expert knowledge and ability to build bespoke development links between Sage 200 and Fedrigoni's SAP system along with a close working relationship with Fedrigoni's Italian IT team.

Industry

Fedrigoni is a global manufacturer of premium paper products and self-adhesive materials.
