Sage Cloud

Sage Private Cloud Solutions

Sage 200   **Development**   **IT Services**   **Cloud**   **Training**

✔ Safe and secure Cloud Hosting

✔ Access your Sage software from anywhere

✔ Experience the latest technology platforms

✔ Your system is backed up, monitored and supported

Paradise
I.T. FOR BUSINESS

Sage Cloud
Sage Private Cloud Solutions

Soon, all software will be delivered like this…

Have you discovered the benefits of connecting to your business via the cloud from anywhere at anytime? As an accredited Sage Partner and Microsoft Gold Partner, we offer comprehensive Cloud Solutions for Sage 50 and Sage 200.

What is Private Cloud?

If you want to safely and conveniently connect to Sage from anywhere in the world, consider Private Cloud Hosting. Adopting cloud helps you reduce infrastructure costs while scaling resources and being agile. You and your team simply connect to the system via the internet.

Security

The Paradise data centres are certified to ISO27001. This means that the facilities are audited annually to ensure you are receiving the best possible care in terms of data security. Your Private Cloud system is backed-up, monitored and supported by IT professionals, with strict working practices and procedures to ensure that everything is carried out to the highest standards.

Ease of Use

Once you experience the latest technology and hardware platforms, you'll soon discover performance that is equal to, or better than, a good local network.

Ask us for a free demonstration system that you can use for a few days to see for yourself.

What software can I use?

Your simple monthly hosting fee covers all hardware and software. After that, you can 'bolt-on' anything else you need. Standard products, such as Microsoft 365 or Exchange/Outlook are available at low cost, which come with additional benefits such as entitlement to upgrade whenever new versions are released.

What are the benefits?

Although Cloud Solutions can be less expensive than 'on-premises' IT solutions, using this approach offers numerous benefits that go beyond cost:

- Universal access for your users from anywhere you need
- The flexibility to add/remove users and resources on demand
- Eliminates the need to provide server or backup resources in terms of hardware and staff time
- Protects against loss of data by accident or intent

Highly reliable

Long term costs are also addressed, as you are unlikely to need upgraded workstations. You can also look forward to savings on insurance, electrical power and technical support.

To find out how Paradise can help your business, or to arrange a demonstration, call us today on 01604 655900 or visit our website www.paradisecomputing.co.uk
